

Demo Content Setup Guide

Step-by-step instructions for uploading and managing products, collections, blog posts, and pages using Matrixify — and how to configure your theme settings in Shopify.

Version: 1.0

Theme: PawVital v14

Platform: Shopify OS 2.0

SECTION 1

What You Need

Files Provided

- ✓ `pawvitalthemev14.zip` — theme
- ✓ `pawvital-matrixify.xlsx` — demo data

Apps & Access

- ✓ Shopify store (any plan)
- ✓ Matrixify app (free tier works)
- ✓ Store owner / Admin access

Demo images are sourced from Unsplash CDN — they load automatically during import. No manual image uploads needed.

SECTION 2

Install the Theme

1 Go to Online Store → Themes

In your Shopify Admin sidebar, click Online Store, then Themes.

2 Upload the theme zip

Scroll down to Theme library → click

Add theme

→

Upload zip file

→ select `pawvitalthemev14.zip`.

3 Preview then Publish

Once uploaded, click

Preview

to check the theme, then click

Publish

to make it live.

4 Verify it's active

The theme should now appear at the top of the Themes page with a green Current theme label.

Tip: If Shopify shows errors during upload, make sure you're using the exact zip file provided — do not re-zip the folder yourself as the file structure must be at root level.

SECTION 3

Install Matrixify

1 Open the Shopify App Store

In Shopify Admin → Apps → Shopify App Store.

2 Search for "Matrixify"

Find the app by Excelify (formerly Excelify). It is free to install for basic imports.

3 Click Install

Accept the permissions. Matrixify will appear under Apps in your admin.

The free Matrixify plan supports importing up to **10 products** per import. The PawVital demo has 8 products, so the free plan is sufficient. For re-importing or updating larger stores, a paid plan may be needed.

SECTION 4

Upload Demo Content

All demo content — products, collections, pages, blog posts, and navigation — is contained in a single Excel file.

1 Open Matrixify

Shopify Admin → Apps → Matrixify.

2 Click "Import"

On the Matrixify home screen, click the **Import** button.

3 Upload the Excel file

Click

Choose file

→ select **pawvital-matrixify.xlsx** → click **Import**

.

4 Wait for completion

Matrixify shows a live progress screen. Images are fetched from Unsplash CDN during import — this can take 2–5 minutes depending on internet speed.

5 Check the results

When complete, Matrixify shows a summary. Click

View results

to see any errors. Green rows = success.

Tip: If any rows show errors, they are usually image fetch failures. Simply run the import again — Matrixify skips already-imported rows and retries failed ones.

What Gets Imported

The Excel file contains the following sheets, each importing a different content type:

Sheet Name	Content Type	Count	Notes
Products	Products & variants	8 products	Includes images, descriptions, pricing, tags
Smart Collections	Auto-collections	10 collections	Rules auto-populate products by tag/type
Custom Collections	Manual collections	4 collections	Best Sellers, Bundles, New Arrivals, Sale
Pages	Store pages	5 pages	About, Contact, FAQ, Shipping, Subscriptions
Blogs / Articles	Blog posts	4 articles	PawVital Blog with images
Redirects	URL redirects	—	Common pet-health search terms
Menus	Navigation links	2 menus	Main menu + Footer menu

Product List

Product	Type	Variants
Hip & Joint Chews for Dogs	Supplement	30 count / 90 count
Feline Calm Drops	Supplement	1 fl oz / 2 fl oz
Omega-3 Skin & Coat Oil	Supplement	8 fl oz / 16 fl oz
Probiotic Digestive Chews	Supplement	60 count / 120 count
Immune Boost Mushroom Blend	Supplement	30 count / 90 count
Dental Fresh Sticks	Dental	12 count / 36 count
Calming Anxiety Wrap	Wellness	S / M / L
Starter Wellness Bundle	Bundle	Dog / Cat

Collection List

By Need (Smart) ✓ Joint & Mobility ✓ Calm & Anxiety ✓ Skin & Coat	By Category / Featured ✓ Supplements ✓ Dental ✓ Wellness
--	---

- ✓ Digestion & Gut
- ✓ Immune Support

- ✓ Best Sellers
- ✓ Bundles & Sets
- ✓ New Arrivals
- ✓ Sale
- ✓ All Products
- ✓ Food & Treats

After Import — Theme Setup

Once Matrixify finishes, configure the theme sections in the Shopify Customizer.

Open the Customizer

Shopify Admin → Online Store → Themes → click **Customize** next to PawVital.

Homepage Sections

Section	What to Set
Announcement Bar	Edit the 3 marquee messages (shipping, vet-formulated, subscribe & save)
Hero	Upload a hero image (1200×800px recommended), set heading and CTA button link
Featured Categories	Select up to 6 collections from the imported ones
Featured Collection	Select Best Sellers or All Products
Benefit Band	Upload a product lifestyle image, edit the 4 benefit points
Subscription CTA	Edit headline and link to /pages/subscriptions
Testimonials	Edit the 3 customer review cards
Newsletter	Connect to your email provider or Shopify Email

Header Settings

- 1 Set the main menu**
In Header settings → Menu → select Main menu (imported by Matrixify).
- 2 Upload logo (optional)**
The theme ships with the PawVital SVG logo. Upload a custom logo under Header → Logo image.
- 3 Set mega menu featured image**
Under Header → Mega menu featured column — upload an image and set the CTA link to </collections/bundles>.

Footer Settings

In the Customizer → Footer section, select Footer menu as the navigation source. The footer is pre-structured with SHOP, LEARN, and SUPPORT columns matching the imported menu.

Tip: Save the Customizer frequently using the **Save** button at the top right. Changes are not auto-saved.

Managing Content After Import

Editing Products

1 Go to Products

Shopify Admin → Products → click any product name.

2 Edit title, description & pricing

Use the rich text editor for description. All benefit bullets display as a bulleted list in the product accordion.

3 Add/replace images

Drag & drop images in the Media section. The first image becomes the main product photo. Recommended size:

1000×1000px

square.

4 Manage variants

Under Variants → edit price, compare-at price, SKU, and inventory for each size/option.

Editing Collections

1 Go to Products → Collections

Click any collection to edit title, description, image, and sort order.

2 Smart collections auto-populate

Collections like Joint & Mobility use rules (e.g. tag = **joint**). Products with matching tags appear automatically.

3 Collection images

Click Add image in the collection editor, or re-import via Matrixify with updated image URLs.

Editing Pages

Shopify Admin → Online Store → Pages. Click any page (About, Contact, FAQ, etc.) to edit the content using the rich text editor. All page content renders with proper line-height and heading spacing via the theme's RTE styles.

Editing Blog Posts

Shopify Admin → Online Store → Blog posts. Click any article to edit the title, content, featured image, and tags. New articles are published immediately unless you set a future publish date.

Do not delete the "PawVital Blog" blog channel — only delete individual articles. Deleting the blog itself removes the blog page from the store.

Replacing Demo Images

All demo images are placeholder photos from Unsplash. Replace them with real product/brand photos before going live.

Product Images

Recommended Size	Format	Where to Upload
1000 × 1000 px (square)	JPG or WebP	Product → Media section
First image = main photo	—	Drag to reorder
Up to 250 images per product	—	Each variant can have its own image

Collection Images

Recommended Size	Format	Where to Upload
800 × 800 px (square)	JPG or WebP	Products → Collections → click collection → Add image

Hero & Section Images (Customizer)

Section	Recommended Size
Hero (main banner)	1400 × 900 px
Benefit Band	900 × 900 px
Mega menu feature image	400 × 260 px
Blog article featured image	1200 × 630 px

Finding Free Images (Unsplash)

- 1

Go to unsplash.com

Search for pet, dog, cat, supplement, wellness, etc.
- 2

Download free

Click the image → Download free. No account needed for standard downloads.
- 3

Upload to Shopify

Drag the downloaded image directly into the product or collection image area in Shopify Admin.

Unsplash images are **free for commercial use** — no attribution required. You may not resell the images as standalone files.

Common Issues & Fixes

Issue	Cause	Fix
Matrixify shows image errors	Unsplash CDN timed out during import	Re-run the import — Matrixify retries failed images automatically
Collections are empty after import	Smart collection rules use tags not yet on products	Check that products have the correct tags (e.g. <code>joint</code> , <code>calm</code> , <code>skin</code>)
Homepage shows "No content"	Customizer sections not configured yet	Open Customizer → add sections and select collections/products
Menu shows wrong links	Main menu not selected in Header settings	Customizer → Header → Menu → select Main menu
Checkout goes to homepage	Store password protection enabled	Shopify Admin → Online Store → Preferences → disable password
Theme not showing after upload	Theme not published	Online Store → Themes → click Publish next to PawVital
Product page 404	Product handle mismatch	Shopify Admin → Products → check the URL handle matches the collection link
Cart shows 0 items after adding	Browser cookie blocked	Disable browser extensions / try incognito mode

Matrixify Import Tips

- ✓ Always import products **before** collections (collections depend on product tags)
- ✓ Use the **MERGE** command (already set in the Excel file) to avoid duplicate products on re-import
- ✓ If you see a "rate limit" error, wait 60 seconds and click Continue in Matrixify
- ✓ Check the Results tab after every import — green = success, red = needs attention
- ✓ Matrixify preserves existing content — it only updates rows included in the file

Never use "DELETE" command in Matrixify unless you intend to permanently remove content. This action cannot be undone.

Quick Reference Checklist

Use this checklist to confirm everything is set up correctly before handing the store to your client.

Theme & Content

- ✓ PawVital theme uploaded and published
- ✓ Matrixify import completed with no errors
- ✓ All 8 products visible in Shopify Admin → Products
- ✓ All 14 collections visible in Shopify Admin → Collections
- ✓ 5 pages visible in Online Store → Pages
- ✓ Blog posts visible in Online Store → Blog posts
- ✓ Main menu and Footer menu imported correctly

Theme Customizer

- ✓ Header → Menu set to "Main menu"
- ✓ Hero section has image, heading, and CTA link
- ✓ Featured Categories section shows 6 collections
- ✓ Featured Collection section linked to a collection
- ✓ Footer menu set to "Footer menu"
- ✓ All sections saved in Customizer

Store Settings

- ✓ Password protection disabled (Online Store → Preferences)
- ✓ Shipping zones configured (Settings → Shipping)
- ✓ Payment provider connected (Settings → Payments)
- ✓ Store currency set correctly (Settings → Store details)
- ✓ Contact email set (Settings → Store details)

Test Before Go-Live

- ✓ Add a product to cart and complete a test order
 - ✓ Test on mobile — check product page, cart, and checkout
 - ✓ Test search — search for "joint" and "calm"
 - ✓ Test product page accordions (Description, Shipping, Ingredients)
 - ✓ Test cart drawer — add, change quantity, remove, checkout
 - ✓ Verify all collection pages show products
 - ✓ Verify Contact page loads correctly
-
